

WHEN SHOULD I VACCINATE MY HORSES?

The Equine Infectious Diseases Advisory Board have developed an easy to follow vaccination protocol. We recommend you use these guidelines when planning an annual vaccination schedule for your horses.

HENDRA VIRUS
 The Equine Infectious Diseases Advisory Board supports the Australian Veterinary Association's position to strongly recommend that all horses in Australia are vaccinated against Hendra virus to help protect humans from its potentially fatal outcome.
 Hendra virus vaccine and equine herpes virus vaccine are both for vet-only administration.

NOTE: In the event that you are unsure of your horse's vaccination status, consult your vet about undertaking a Vaccination Priming Regimen * Priming protocol is one dose at eight, nine and ten months of pregnancy
 ** Foals born to mares vaccinated with Equivac HeV should commence vaccination at 6 months of age. Zoetis Australia Pty Ltd. Level 6, 5 Rider Boulevard, Rhodes NSW 2138. © 2016 Zoetis Inc. All rights reserved. Jun 2016. ZOEEQU1390. ZOEEQU00068
